

SOLAR LED ENHANCED ROAD SIGNS (CHEVRON)

Features

Solar LED enhancing road signs is a simple and effective way to increase the visibility of the message and improve the safety of pedestrians and vehicles. The innovative technology employs a set of synchronised ultra-bright reflective backed LEDS that operate day and/or night and are visible up to 2000 metres. A solar panel connected to high-quality lithium-ion battery allows >5*24 hours of LED operation from a single full charge. The road signs offered are manufactured to Australian standards from aluminium and 3M reflective material and attach to standard 60mm galvanised signposts to provide efficient and effective visual enforcement.
